LIGHT KIT INSTRUCTION MANUAL

SAFETY RULES

"CAUTION-RISK OF FIRE"

CONSULT A QUALIFIED ELECTRICIAN TO ENSURE CORRECT BRANCH CIRCUIT CONDUCTOR.

WARNING! RISK OF ELECTRIC SHOCK

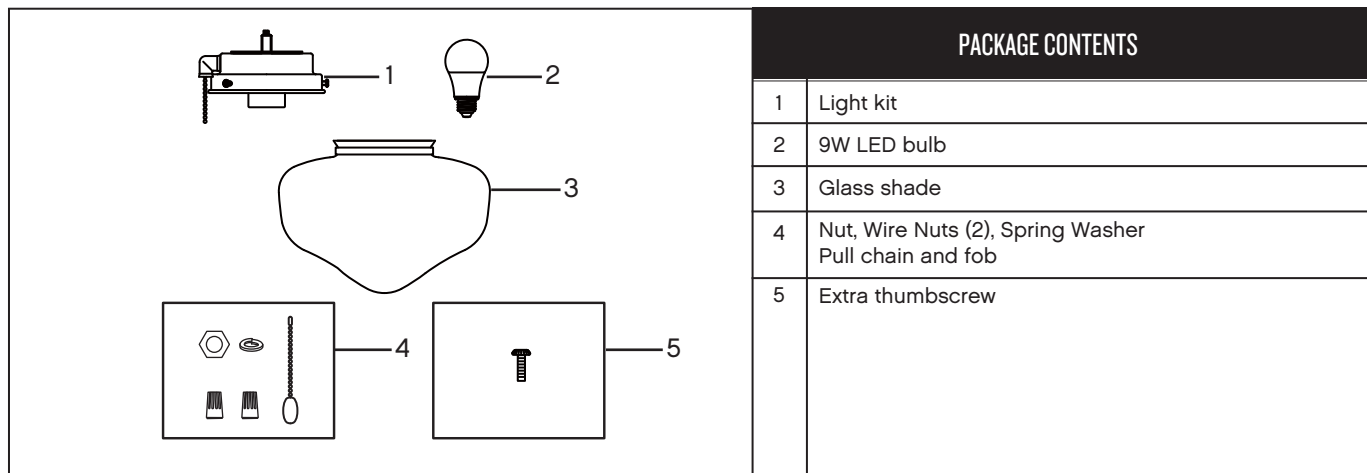

All electrical connections must be made in accordance with local codes, ordinances, or national codes. If you are unfamiliar with installing electrical wiring, secure the services of a qualified electrician. Before starting this installation, disconnect the power by turning off the circuit breaker at your main panel or removing the fuse at the fuse block. Turning the power off using the ceiling fan switch (speed control on/off) is not sufficient to prevent electrical shock.

NOTE: The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care are factors which cannot be built into any product. These factors must be supplied by the person (s) caring for and operating the unit.

UNPACKING YOUR LIGHT KIT

UNPACK YOUR LIGHT KIT AND CHECK THE CONTENTS.

- Do not discard the carton. If warranty replacement or repair is ever necessary, the fan should be returned in original packing. Remove all parts and hardware.
- Examine all parts. You should have the following:

INSTALLING THE LIGHT KIT

WARNING: Be sure electricity is turned off at the main power box before wiring.

- 1 Remove and discard the center plug from the switch housing. Attach the light kit to the switch housing by feeding the light fixture wires (black and white) through the hole in the center of the switch housing, then screw the light fixture stem onto the switch housing. (Fig. 1)
- 2 Thread the nut & lock washer onto the light fixture stem inside the switch housing making sure the light fixture is secure, preventing movement after installation. (Fig. 1)
- 3 Locate the white and blue wires inside the switch housing labeled FOR LIGHT.
- 4 Attach the wires from the light kit to the wires inside the switch housing by pushing the polarized connections together. (Fig. 1)
 - White wire to White wire
 - Black wire to Black (Blue) wire
- 5 Raise and hold the light kit assembly close to the switch housing hub of the ceiling fan. Push the square wire connectors together. (Fig. 2)

NOTE: The square connectors are color coded. Match the color coded sides of each plug and push. They will attach ONLY when matched correctly.
- 6 Carefully push all wires back into the switch housing, then install the light kit assembly onto the switch housing hub with 3 screws provided. Be sure to tighten all screws. (Fig. 2)
- 7 Install one 9 Watt LED bulb (included).
- 8 Mount the glass shade to the light sockets by unscrewing partway the three light holder thumbscrews on glass holder. Insert the glass shade, then gently tighten the thumbscrews by hand evenly to the thumb shade. Do not overtighten.

INSTALANDO EL KIT DE ILUMINACIÓN

ADVERTENCIA: Asegúrese de que la electricidad esté apagada en la caja de alimentación principal antes de realizar el cableado.

- 1 Retire y deseche el tapón central de la carcasa del interruptor. Conecte el kit de luz a la carcasa del interruptor alimentando los cables de la lámpara (blanco y negro) a través del orificio en el centro de la carcasa del interruptor, luego atornille el vástago de la lámpara a la carcasa del interruptor. (Figura 1)
- 2 Enrosque la tuerca y la arandela de seguridad en el vástago del accesorio de iluminación dentro de la carcasa del interruptor asegurándose de que el accesorio de iluminación esté seguro, evitando el movimiento después de la instalación. (Figura 1)
- 3 Localice los cables blanco y azul dentro de la caja del interruptor etiquetados PARA LUZ.
- 4 Conecte los cables del kit de luces a los cables dentro de la carcasa del interruptor presionando las conexiones polarizadas. (Figura 1)
 - Cable blanco a cable blanco
 - Cable negro al cable negro (azul)
- 5 Levante y sostenga el conjunto del kit de luz cerca del cubo de la caja del interruptor del ventilador de techo. Empuje los conectores de cable cuadrado juntos. (Figura 2)

NOTA: Los conectores cuadrados están codificados por colores. Haga coincidir los lados codificados por color de cada enchufe y empuje. Se unirán SOLAMENTE cuando coincidan correctamente.
- 6 Empuje con cuidado todos los cables dentro de la carcasa del interruptor, luego instale el conjunto del kit de luces en el cubo de la carcasa del interruptor con los 3 tornillos provistos. Asegúrese de apretar todos los tornillos. (Figura 2)
- 7 Instale una bombilla LED de 9 vatios (incluida).
- 8 Monte la pantalla de vidrio en las tomas de luz desenroscando parcialmente los tres tornillos de mano del soporte de la luz en el soporte de vidrio. Inserte la pantalla de vidrio, luego apriete suavemente los tornillos con la mano de manera uniforme a la pantalla. No apriete demasiado.
